SPWLA Foundation. This fund supports scholarships in higher education and research in formation evaluation. Please send donations to: SPWLA, 8866 Gulf Freeway, Suite 320, Houston, TX 77017, USA

ISSN 1529-9074

PETROPHYSICS is published bimonthly by the Society of Petrophysicists and Well Log Analysts (SPWLA). Subscription is included in annual dues for members. Library Subscription cost is \$250 (6-issues, Feb, April, June, Aug, Oct, Dec) Send Subscription and member address changes to the SPWLA business office. Back issues if available are \$35 each to members and \$45 each to library subscribers.

ADVERTISING RATES: (based on one-time, full color) Full Page: \$1500, Half Page: \$1200, Quarter Page: \$1000. Additional fee for printing on covers. Media kits are available by contacting the SPWLA business office or by visiting the SPWLA website [www.spwla.org](http://www.spwla.org). Responsibility: The statements and opinions expressed in PETROPHYSICS are those of the authors and should not be construed as an official action or opinion of the Society of Petrophysicists and Well Log Analysts, Inc. © Copyright 2020 by the Society of Petrophysicists and Well Log Analysts, Inc.

### About the Cover

Increasing reservoir volume post-stimulation is a major challenge for the industry. In this issue, Mustafa et al. introduce a new stimulation technique to improve gas production and increase the stimulated reservoir volume in tight reservoirs by creating localized fractures and connecting existing fractures using thermochemical reagents.

PRINTED IN USA ON ACID FREE PAPER

# PETROPHYSICS

August Vol. 61, No. 4

## Contents

333 From the Editor

## ARTICLES

334 **A Study of the Flexural Attenuation Technique Through Laboratory Measurements and Numerical Simulations**

Tore Sirevaag, Tonni Franke Johansen, Idar Larsen, and Rune Martin Holt

352 **Effects of Clay Minerals and Pore-Water Conductivity on Saturation Exponent of Clay-Bearing Sandstones Based on Digital Rock**

Yufei Fan, Baozhi Pan, Yuhang Guo, and Jian Lei

363 **Improvement of Petrophysical Properties of Tight Sandstone and Limestone Reservoirs Using Thermochemical Fluids**

Ayyaz Mustafa, Mohamed Mahmoud, Abdulazeez Abdulraheem, Zeeshan Tariq, and Ayman Al-Nakhli

383 **Detecting Specific Facies in Well-Log Data Sets Using Knowledge-Driven Hierarchical Clustering**

Irina Emelyanova, Jean-Baptiste Peyaud, Tess Dance, and Marina Pervukhina

Full-Color versions of all technical articles are available in the digital edition of **Petrophysics**, which is free to SPWLA members and can be found at [https://www.spwla.org/SPWLA/Publications/Journals/Recent\\_Petrophysics\\_Journals.aspx](https://www.spwla.org/SPWLA/Publications/Journals/Recent_Petrophysics_Journals.aspx).

The Society of Petrophysicists and Well Log Analysts is dedicated to the advancement of the science of formation evaluation through well logging and other formation evaluation techniques. SPWLA is dedicated to the application of these techniques, to the exploration and exploitation of gas, oil and other minerals. PETROPHYSICS publishes original contributions on theoretical and applied aspects of formation evaluation; particularly well logging and petrophysics.
