**About the Cover**

On the cover: From the paper by Evseev et al, magnetization decay in diffusion-relaxation simulation for arkosic sandstone. The six pictures show the 3D magnetization distribution at consecutive moments in time. The magnetization values were normalized to the range 0 to 1.

The Society of Petrophysicists and Well Log Analysts is dedicated to the advancement of the science of formation evaluation through well logging and other formation evaluation techniques. SPWLA is dedicated to the application of these techniques, to the exploration and exploitation of gas, oil and other minerals. PETROPHYSICS publishes original contributions on theoretical and applied aspects of formation evaluation; particularly well logging and petrophysics.
